PROFESSIONAL SUMMARY

Computer Science student at the University of Oklahoma (3.5 GPA) seeking an IT internship. Combines hands-on development experience in Java, Python, and C++ with real-world leadership, including training a team of 10+ associates and analyzing performance metrics. Strong communicator with experience presenting technical work to faculty and industry judges.

EDUCATION

University of Oklahoma — Bachelor of Science in Computer Science Norman, OK

GPA: 3.5 | Expected May 2028

Relevant Coursework: Data Structures, Discrete Structures, Programming Structures and Abstractions

Deer Creek High School — High School Diploma Edmond, OK

Valedictorian, Oklahoma Academic Scholar | May 2024

EXPERIENCE

Customer Service Specialist July 2024 – Present

Dick's Sporting Goods

- Supervise daily operations and direct a team of 10+ cashiers during shifts.
- Coach and train associates one-on-one on customer-facing processes, including protection plan and credit application processes.
- Track and analyze monthly store performance metrics against other stores in the district, preparing reports to identify gaps and measure progress.
- Diagnose and resolve escalated customer and point-of-sale issues.
- Ranked first among peers as Metric Leader (July 2026) across protection plan sales, credit card applications, and account registration rate.

RESEARCH & PROJECTS

Iteration vs. Recursion Performance Benchmarking — Research Project OU Gallogly College of Engineering

Faculty Advisor: Dr. Sanjana Mudduluru | Team of 4

- Designed and executed a cross-platform benchmarking study in Java comparing iterative and recursive implementations of Binary Search, Factorial, Fast Exponentiation, and Fibonacci algorithms across Windows, macOS, and Linux.
- Identified and documented a key performance distinction between source-file and pre-compiled execution modes, strengthening the study's methodology and conclusions.
- Presented findings as a research poster to faculty and industry judges.

Workout Tracker — Python

github.com/landonalexander16/workout-tracker

- Built a command-line application using a class-based model (Session, Exercise, Set) to log and organize workout data.
- Implemented input validation to handle invalid user entries and prevent bad data.
- Added file-based persistence across sessions organized by date.

Snake Game — C++, SDL2

github.com/landonalexander16/snake-game

- Developed a 2D Snake game in C++ using the SDL2 library, featuring grid-based movement, a growing trail, and self-collision detection.
- Managed the game loop, real-time keyboard input, and rendering, configuring a MinGW-w64 build toolchain.

SKILLS

Programming: Java, Python, C++

Tools & Libraries: Git/GitHub, VS Code, Eclipse, JUnit, SDL2, Microsoft Office (Word, Excel, PowerPoint)

Professional: Troubleshooting, user training, technical documentation, team leadership

AWARDS & HONORS

- President's Honor Roll, University of Oklahoma | Spring 2026
- National Honor Society | 2020 – 2024
- Deer Creek Foundation Award | 2024
